

ONSITE SUPPORT

# BIOSCIENCE

SoBran  
BioScience

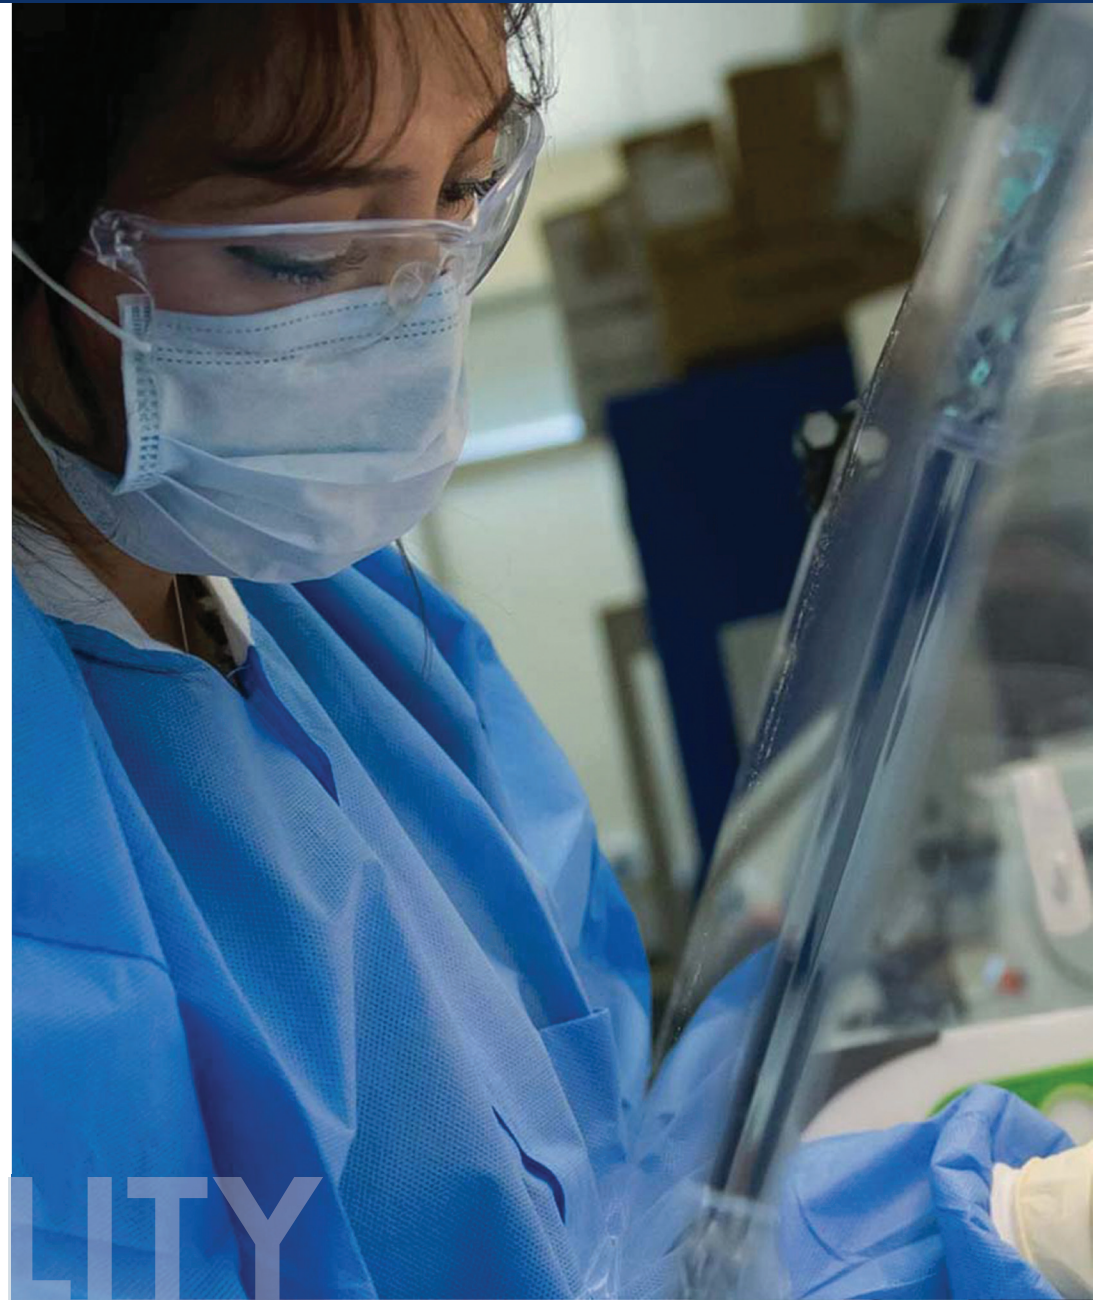

## Part of Your Team

Through onsite support services, SoBran scientific and technical professionals integrate with client's team of researchers, providing seamless support to your animal care program. We work collaboratively with you to ensure that your research efforts are conducted in the most professional and effective manner and maintain the highest levels of humane care and quality assurance.

Our out-of-the box thinking and flexible approaches to problem solving, allow us to recognize opportunities for program improvements and drive operational efficiencies that produce cost savings. Clients count on us to see projects through to successful conclusions, on time and within budget.

Quality Laboratory animal Care SoBran understands that in vivo research results fundamentally depend on the quality of laboratory animal care. Our team of experts manage and operate several laboratory animal facilities at client sites including Animal Biosafety Level (ABSL) I through III.

A partnership with SoBran gains you experienced professionals, dedicated to working with and alongside you to create and maintain a high-quality animal program for years to come.

# QUALITY

# Partnering for your Success. Motivated by Discovery.

## SoBran BioScience

### Quality Laboratory Animal Care

SoBran understands that in vivo research results fundamentally depend on the quality of laboratory animal care. Our team of experts manage and operate several laboratory animal facilities at client sites including Animal Biosafety Level (ABSL) I through III, conventional, quarantine, and barrier facilities. Our proven capabilities in a wide range of industry settings ensure we have a solution to meet your needs, 24 hours a day, seven days a week.

For more than a decade we have supported some of the most complex and demanding laboratory animal care programs through ISO 9001:2015 certified program management, operations, integrated data management, animal inventory control, and comprehensive regulatory support. Our quality control processes can accommodate Good Laboratory Practice (GLP) studies.

Our experience and expertise include:

- Animal resource program management
- Facility and equipment operations
- Laboratory animal care
- Veterinary medical and technical procedures
- Quality assurance and technical training
- Technical research support
- Regulatory and accreditation assistance

### Research of Worldwide Importance

Clients served:

- National Institute of Allergy and Infectious Diseases (NIAID)
- The Vaccine Research Center (VRC), NIAID, NIH
- National Institutes of Diabetes and Digestive and Kidney Diseases (NIDDK)
- National Institute of Arthritis and Musculoskeletal and Skin Diseases (NIAMS)
- National Heart, Lung and Blood Institutes (NHLBI)
- NIH/Division of Veterinary Resources (DVR)
- Eastern Virginia Medical School
- The Johns Hopkins Brain Science Institute
- Walter Reed Army Institute of Research

As the industry leader in designing professional animal care programs, managing animal facilities and providing high quality technical support for laboratory animal research projects, SoBran offers a range of Bioscience Research Support services.

Let us show you how our continued commitment to quality, efficiency and service can help you realize your goals.
